

FILTER KIT For NITRATE REDUCTION

Penstar Point-of-Use Nitrate Filter Kit uses a 10" or 20" slimline filter housing with a nitrate selective resin cartridge to supply a separate drinking water tap.

The cartridge has a 20 micron post filter and is charged with Puralite A520E resin which is described overleaf.

The capacity of the cartridge is approximately 450 litres at a concentration of 100 mg/l and it should be replaced at least every six months for hygienic reasons or more frequently if the resin becomes exhausted.

Technical Specification:

Housing: food-grade polypropylene with EPDM O-ring

Maximum operating temperature: 40 °C

Cartridge Shell: polypropylene

Cartridge post-filter: spun polypropylene

Filter Medium: Purolite A-520E nitrate selective medium
