

NOMINAL-RATED PLEATED CARTRIDGES

Our nominal-rated pleated filter cartridges are designed for the removal of insoluble contaminants from fluids and are a durable construction that in some circumstances can be washed and re-used.

They are suitable for a wide range of applications including domestic water supply and industrial filtration.

These filters are manufactured from durable polyester fabric which is bacteria and chemical resistant.

The medium is pleated around a polypropylene core for added strength and the ends are formed from thermo-setting vinyl plastisol.

The overlap seam is sonically welded to reduce by-pass and maintain filter efficiency.

Maximum continuous operating temperature: 52°C

Sizes available:

Filter diameter: standard and Large diameter

Filter length: 10", 20"

Micron rating (nominal): 1, 5, 30, 50

We also offer a range of absolute and near-absolute pleated cartridges in glassfibre or polypropylene
