

## NOMINAL-RATED SPUN CARTRIDGES

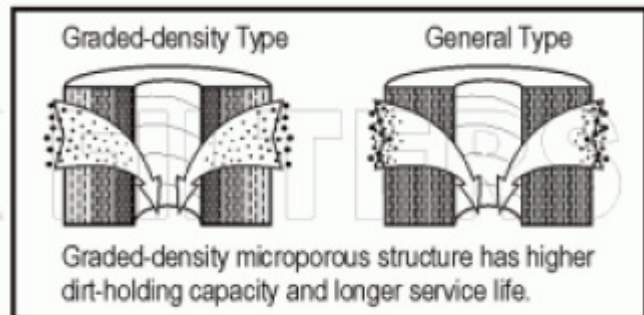

UltraPure nominal-rated spun filter cartridges are manufactured from 100% polypropylene microfibre medium and designed for the removal of insoluble contaminants from fluids.

These new generation cartridges combine high purity and consistent performance, the extremely fine filaments generated by the melt-down process build up a micro-porous structure with large void volume allowing high flow rates, low pressure drops and high efficiency filtration.

UltraPure cartridges feature graded-density design, with the advantages of high dirt-loading capacity and long service life. As the water passes from the outside to the inside of the cartridge, the degree of filtration is progressively finer.

Suitable for a wide range of applications:

- Domestic water supply
- Industrial water treatment
- Bottled water pre-filtration
- Photographic solutions
- Plating & coating solutions
- Machine oils & cutting tools
- Cooking & vegetable oils
- Paints & inks
- Syrups & beverages pre-filtration
- DI & ultra-pure water pre-filtration

Recommended Maximum Operating Conditions

- Permitted  $\Delta P$ : 3.5 bar @ 20°C
- Continuous  $\Delta P$ : 2 bar @ 20°C
- Continuous operating temperature: 60°C

Sizes available:

Filter diameter: standard and Large diameter

Filter length: 5", 10", 20", 30" 40"

Micron rating (nominal): 1, 5, 10, 25, 30, 50, 75, 100

Absolute-rated and high-strength Utrapure filter cartridges are also available with a selection of thermally welded end caps.
